

Jorge Luis Buenrostro Montejano

jlbmontejano@gmail.com | jorgebuenrostro.com | github.com/jlbmontejano

Summary

Full-stack developer with experience across web, mobile, and backend systems using TypeScript, React, Node.js, and PostgreSQL. Comfortable picking up new technologies fast and delivering across the full stack, from CI/CD pipelines and Docker deployments to responsive UIs and iOS apps. Experienced with unit, integration, and end-to-end testing using Jest, Vitest, and Playwright.

Skills

Languages: TypeScript, JavaScript, HTML, CSS, SQL, Swift

Frameworks & Libraries: React, Node.js, Express, Vue, SwiftUI, Tailwind CSS, Prisma

Databases: PostgreSQL, Google Firestore

Tools & Platforms: Git, GitHub Actions, AWS, Docker, Jest, Vitest, Playwright, DigitalOcean, REST APIs

Experience

Sportsminers - Full-Stack Developer Oct 2023 – Jan 2025

- Set up automated GitHub Actions CI/CD pipeline, reducing deployment time by 80%
- Architected the foundational structure for an internal basketball player scouting application, improving development speed, and reducing infrastructure costs
- Built and deployed secure authentication system and responsive multi-page UI, enabling user account management and protected application access

IT Nora - Full-Stack Developer Mar 2023 – Oct 2023

- Developed key components for company's landing page including interactive contact forms and client portfolio showcase, improving lead capture and user engagement through responsive UI
- Digitized complex government aid forms for military veterans, implementing validation logic that reduced processing errors and ensured compliance with official requirements
- Built profile editing interface for published the Catch Zone social media app, enabling users to update and manage personal account information

Huard Technology Services - iOS App Developer Aug 2022 – Mar 2023

- Contract-based job; self-taught in iOS development using Swift/SwiftUI to deliver client project, transitioning from web technologies with no prior mobile development experience
- Developed iOS application for snow-making machine monitoring, implementing Bluetooth communication protocol to parse and display real-time binary data from industrial equipment
- Designed intuitive interface to make complex machine data accessible to non-technical operators

Projects

Let Us Dine github.com/jlbmontejano/let-us-dine

- Containerised with Docker and deployed to a DigitalOcean droplet with a GitHub Actions CI/CD pipeline that blocks deployments on failing tests
- Implemented a testing strategy covering unit tests with Jest and Vitest, and end-to-end tests with Playwright to ensure reliability across the full stack
- Built and deployed a full-stack web application using TypeScript, React, Node.js, and PostgreSQL, enabling groups to find restaurants based on aggregated user preferences and location
- Integrated Google Places API with server-side filtering across price, rating, vibe, and beverage preferences to return ranked restaurant results

Education

Centro Universitario de Estudios Musicales - Bachelor of Music

Dec 2019
